## WORK EXPERIENCE

---

### Graduate Trainee (Apprenticeship)

Oct 2023 - Present

Fidelity Investments | Bangalore, India

- Completed extensive training in Angular, gaining proficiency in building dynamic web applications.
- Built custom scrolling directives to enhance user experience on key project modules.
- Contributed to the development lifecycle by making API calls to integrate backend services with the frontend, ensuring seamless data flow.
- Conducted comprehensive unit testing to cover 100% code coverage for existing projects, significantly improving code reliability and reducing post-release bugs.
- Resolved critical SonarQube issues, improving code quality and maintainability by adhering to best practices.
- Gained hands-on experience with industry-standard tools such as Visual Studio Code and GitHub for efficient version control and code management.

### Junior Software Engineer-Trainee

June 2023- July 2023t

iRely Soft Services (India) Pvt. Ltd. | Bangalore, India

- Gained hands-on experience in developing Angular applications by implementing front-end features independently.
- Strengthened expertise in Angular concepts such as components, services, and data binding.
- Focused on improving code quality through debugging, optimization, and adhering to best practices.
- Expanded understanding of front-end development workflows, including version control with Git.

## PROJECTS

---

### Ecommerce Application

- Developed a full-stack web application using the Angular framework and Express , NodeJs delivering a robust and scalable solution.
- Introduced key features such as product listing, user authentication, and shopping cart functionality.
- Gained practical experience in integrating front-end with back-end services using REST APIs, improving data flow and communication between the client and server.

## Budget Planner Application.

- Created a Budget Planner application using Angular, allowing users to track and manage their expenses on a monthly or annual basis.
- Implemented dynamic data-binding and reusable components to streamline user interaction and enhance application performance.
- Integrated custom validation and input controls to ensure accurate data entry and prevent budgeting errors.

## CERTIFICATIONS
